Novel Materials

‘New space age materials from
the realm of science fiction.’

Silicon Clover

- ‘...mix some silicon and metal bits and have them spontaneously assemble themselves into electronic components.’
 - Discover

Helio-Beryllium

- Unusual alloy combines a metal and a gas.

Krimskell Fiber

- A "claw" fiber which will rubs against itself in such a way that, the tighter the rope is pulled, the stronger the knot becomes.

Lunar Concrete

- A building material using lunar dust or similar surface material as a main ingredient.

Twing

- Used in the hold of spaceships to keep articles all together, and to prevent them from floating around in free fall, or falling during periods of acceleration.

Architectural Coral

- - 'A structure grown to a specific shape using small coral-like organisms.'

Vaz

- A universal lubricant useable in many forms, expedate the incompatable meeting of objects. In “Vurt” by Jeff Noon.

Eadhamite

- Synthetic material that creates extremely smooth roads.

Scop

- Protein grown in bacteria-filled vats. Okay, you don't eat cows, chickens or fish. How about a smaller creature really small? Single Cell Protein (SCP) is making competitive inroads on soybean and fishmeal for feed supplementation.

Synthehol

- is a science-fictional substitute for alcohol that appears on the **Star Trek: The Next Generation** television series. It allows drinkers to experience all of the enjoyable, intoxicating effects of alcohol without unpleasant side-effects like hang-overs

Arup Consultation

Superblue Design Ltd.

- Superblue is a multi-disciplinary design consultancy that creates nurturing, engaging and communicative projects. Through the use of innovative and strategic design we are hands-on, involved and committed to our clients and their communities. We treat each project as unique.
